## **DETAILED ACTION**

## Claim Rejections - 35 USC § 1031

Claims 1-5, 8, 9, 12-18, 19, 22, 23, 25 and 28-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 56-73035. The reference teaches a process of reacting an alkylene oxide with water in the presence of a catalyst that contains Ti or Zr which process the instant claims read upon. As to the claims that recite specific reaction conditions, it is well within the skill of the artisan to operate within the parameters suggested by the disclosure of the reference and carry out the prior art process with the expectation that one will obtain the results taught in the reference. The optimization of reaction conditions for a particular reaction system to optimize a result (such as to maximize the yield of a desired product) is well within the skill of the artisan through routine experimentation, *In re Aller*, 105 USPQ 233.

Claims 1-5, 8, 9, 12-18, 19, 22, 23, 25 and 28-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 4,543,430. <sup>&</sup>lt;sup>1</sup> The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

<sup>(</sup>a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

parameters suggested by the disclosure of the reference and carry out the prior art process with the expectation that one will obtain the results taught in the reference. The optimization of reaction conditions for a particular reaction system to optimize a result (such as to maximize the yield of a desired product) is well within the skill of the artisan through routine experimentation, *In re Aller, supra*.

Allowable Subject Matter

Claims 6, 7, 10, 11, 20, 21 and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
